

Model AM 540

Wankel Engine Model (on base)

- Rotating engine model, true to the original and complete with cutaway carburettor.
- The rotor (triangular piston), operated by the driving shaft, rotates inside the stator thus clearly showing the different phases.
- During the compression phase a small bulb lights up to simulate the petrol ignition.
- Light metal construction.

The engine operates manually through a crank handle

The cutaway models are carefully sectioned for training purposes, professionally painted with different colours to better differentiate the various parts, cross-sections, lubricating circuits, fuel system, cooling system, etc. many parts have been chromium, plated and galvanized for a longer life.

Wankel Engine Model

Weight and Dimensions

- Cm :20x40x30h
- Net weight :6 kg
- Gross weight :8 kg

Packing included approximately.
